

LASSO GAME HELP DOCUMENT

Neeraj Prabhu 200070049

The objective of the game is to collect as many coins as possible using a lasso and move forward through the levels as quickly as possible

GAME GUIDELINES:

The game consists of 4 levels:

- Level 1 consists of 1 coin moving up and down in a straight line. This level can be passed by collecting 4 coins.
- Level 2 consists of 1 coin moving in a parabolic path at a pretty slow speed. To move to the next level from this, you need 8 total coins.
- Level 3 consists of 4 coins moving in all kinds of directions, including a coin that moves and spawns randomly on the game board. To complete this level, you need to have 13 total coins. From this level onwards, magnitudes of lasso adjustments such as speed, angles are quadrupled to increase difficulty.
- Level 4 consists of 2 bombs along with 2 coins. The 2 bombs if collected reduce your total score by 1.
- The game is completed when you collect 17 coins

CONTROLS:

Press 't' to release the lasso from its initial position

Press 'y' to bring the lasso back to its original position, once released

Press 'l' to loop any nearby coins or bombs into the lasso

Press '[' to reduce the angle of elevation for release of lasso

Press ']' to increase the angle of elevation for release of lasso

Press '-' to decrease the speed of the lasso

Press '=' to increase the speed of the lasso

Press 'q' to Quit the game
